Justification / Uzasadnienie

The scientific achievements of Grzegorz Miebs, according to the experience of the Commission members, are outstanding among other doctoral students at the same stage of advancement. According to WoS, the Ph.D. student has a Hirsch index at level 3. He has published eight papers in total in prestigious journals in the discipline of information and communication technology. Worth emphasizing is their total number of citations is equal to 81 (and 75 without self-citations). All scheduled tasks are carried out following the assumed schedule, even with some advance to the plan. From among the six planned articles in IRP, the Ph.D. student has already published three (1 x 200 points and 2 x 140 points according to the Ministry of Science and Education). The fourth one is currently in the review process. The Ph.D. student presented research results at two well-known conferences in the discipline, namely the 31st European Conference on Operational Research (EURO-31st) and a Virtual meeting of the International Federation of Operational Research Societies (IFORS 2021). In addition, Mr. Grzegorz Miebs also took part in a three-month industrial internship at PSI, which ended with a publication in the Neural Processing Letters journal. It is also worth emphasizing the international cooperation that the Ph.D. student carries out during the research, for example, with Prof. Kannan Govindan from the University of Southern in Odense (Denmark) and Dr. Matteo Spada at ETH Zurich (Switzerland). Ph.D. student confirmed that cooperation with the Supervisor, Prof. Milosz Kadzinski is very fruitful. Finally, the Ph.D. student completed all the required courses from the Individual Education Program. Summing up, the Commission does not see any risks related to completing the work on Mr. Grzegorz Miebs' Ph.D. thesis on time.
