Justification / Uzasadnienie

The student presented a clear and legible research plan, presented and properly justified the achievements so far and the research methodology. He is a co-author of one conference publication and one article submitted to the IEEE scientific journal. He participated in the preparation of six reports carried out as part of two scientific and research projects. The work is, in general, proceeding properly, and the fact that the Ph.D. student is the first author of the paper shows that he is fully involved in solving the proposed problem. The presented results show that the Ph.D. candidate has solid and well-established knowledge in the field of investigation. Also, the paper published by the Ph.D. Students can be treated as a significant achievement, e.g., the Globecom conference belongs among the top events in the field of wireless communications (which is the domain of research of the student). The paper which is currently under submission/evaluation, contains significant contribution to the field. There were some slight discrepancies between the plan and realization, but these have been discussed and explained during the evaluation meeting.

Thus, in the commission's opinion, the realized research has been mostly (yet not fully) consistent with the timetable planned in IRP. Following the detailed discussion presented in the mid-term assessment report, the overall assessment of the commission is positive, denoting the presented achievements as good and highly promising.
