

# POZNAN UNIVERSITY OF TECHNOLOGY DOCTORAL SCHOOL

The result of the mid-term assessment together with the justification

Wynik oceny śródkresowej wraz z uzasadnieniem

for the period 01.10.2020 to 31.08.2022

**Radosław Puchalski**

the doctoral student at PUT Doctoral School / doktorant Szkoły Doktorskiej RP

discipline of science / dyscyplina naukowa: **automatyka, elektronika i elektrotechnika / automation, electronic and electrical engineering**

## The result of assessment / Wynik oceny

Positive / Pozytywna*	Negative / Negatywna*
-----------------------	-----------------------

## Justification / Uzasadnienie

Mr Radosław Puchalski, M.Sc., a second-year doctoral student at the Poznan University of Technology in the discipline of Automation, Electronics and Electrical Engineering, presented the results of his research. According to the Committee members although the research topic should be defined more precisely, the research area is interesting and up to date.

Mr Radosław Puchalski, M.Sc. has so far published one co-authored journal paper and one conference paper which is not fully in line with the IRP plan. The journal paper submitted in 2021 has not been accepted. The PhD student explained that he already resubmitted a new version of the manuscript to another journal.

The PhD student in 2022 completed an internship at Imperial College London where he considered research topics related to Kalman and particle filters.

To summarize, Mr Radosław Puchalski, M.Sc. has demonstrated that he, for the most part, has completed the tasks envisaged for implementation in the IRP. Certain deviations from the assumed plan are minor and already addressed so that they should not affect the deadline for the completion of research foreseen for the second quarter of 2024.

All members of the Committee express an unambiguously positive opinion on the activity of Mr Radosław Puchalski, M.Sc.
