Justification / Uzasadnienie

The doctoral student is taking on a very ambitious topic of developing a novel deep learning-based approach for RNA 3D structure prediction. The main innovation relies on choosing a generative approach instead of fully supervised one.

The doctoral student is pursuing further goals as planned. It is also evident that further work is advanced and there are still several important research problems to be solved. It is also noteworthy that the doctoral student demonstrates an in-depth understanding of the research problem and presents his research topic very well. To this end, the doctoral student published his research results in venues including the journal Briefings in Bioinformatics.
