Justification / Uzasadnienie

The Commission concludes that, based on the documentation submitted by the Doctoral Student for the mid-term evaluation and the presentation of her achievements and the scientific discussion with the members of the Commission, the final evaluation is positive. Doctoral student for the mid-term evaluation and the presentation of her achievements and the scientific discussion with the members of the Commission, the final evaluation is positive.

The PhD student gave a well-documented and very practical presentation on the various experiments she carried out in the field of mechanical testing, using destructive and non-destructive methods, in accordance with the schedule of the Individual Research Plan.

The presentation presented the research results and their analysis. In addition, the doctoral student completed case studies in which the experiments carried out (making of orthoses) were applied to real patients. There are already scientific and conference publications that have been produced as part of the dissertation, confirming the work that the doctoral student has done with her supervisor. This confirms the advancement of the work and indicates the doctoral student's strong commitment to scientific and research work, which leads us to believe that the dissertation can be completed on time.
