Justification / Uzasadnienie

The final evaluation of doctoral student Joanna Szewczyk is positive. She has clearly defined research objectives, correctly formulated research hypothesis and uses appropriate methods to prove it. Her proposed dissertation topic: "Enhancing the security of wireless systems by exploiting the properties of the physical layer" properly reflects the scope of the research conducted.

The doctoral student is working on cryptographic algorithms using the properties of the physical layer and tailored to devices with limited memory, computing power and communication channel speed. The research method proposed by M.Sc. Joanna Szewczyk is appropriate for the problem under consideration.

The Commission accepts the timeliness of the tasks resulting from the Individual Research Plan.
