Justification / Uzasadnienie

Having reviewed the interim progress report and the documentation of the doctoral candidate's achievements, and following an interview with the candidate, the Interim Assessment Committee evaluates the implementation of the Individual Research Plan (IRP) as decidedly positive.

The doctoral candidate carries out the research tasks in an exemplary manner — on schedule and in full accordance with the timeline set out in the IRP. The reporting period has yielded a number of significant achievements: the complete execution of the planned experimental research, encompassing the preparation of MBC samples, the development and application of biodegradable biological coatings, and the performance of water-absorption tests; the publication of three research articles in journals listed in the register of the Ministry of Education and Science (MEiN), two of which are rated at 100 points and carry high Impact Factors — 3.4 and 3.9, respectively; and active participation in scientific conferences. Particularly noteworthy is the establishment of international research collaboration with a centre in Chile, together with the twofold acquisition of funding under the PRELUDIUM grant scheme.

*The doctoral candidate demonstrates strong commitment, research independence, and notable scholarly accomplishment. The results presented to date, along with the advanced stage of work on the dissertation (estimated at approximately 65%), **provide full assurance that the doctoral thesis will be submitted on time and to a high standard.***
