Justification / Uzasadnienie

The doctoral candidate has conducted a literature review, formulated a scientific research problem, and established a detailed research programme. The research is being carried out in accordance with the approved schedule. In the Committee's opinion, the research makes a scientific contribution and has significant practical value. The doctoral candidate has completed more than 45% of her Individual Research Plan (IRP), while the Committee estimates the actual level of completion to be over 50%.

The research progress, analysis of results, and formulation of conclusions presented in the Mid-Term Report are comprehensive and logical, providing a sufficiently detailed and scientifically justified interpretation of the findings. In the Committee's opinion, it is recommended that the doctoral candidate arrange and undertake a research internship related to her doctoral research and participate in a research project (e.g., PhD Boost). The Committee does not foresee any risks that could adversely affect the progress of further research activities or the successful completion of the doctoral dissertation.
